## ACKNOWLEDGEMENTS

This thesis could not have been accomplished without the close attention of Dr. Frances Woods, my thesis supervisor, who has provided me with invaluable advice and support throughout the study.

My sincere thanks go to Ajarn Martha Young, my thesis committee member, who devoted her time to edit the manuscript and patiently guide me through the thesis process, and who encouraged me at all times. I would also like to thank Ajarn William Hendel for additional manuscript editing and Dr. Lamar Robert for his help with statistics.

My gratitude is extended to the faculty, staff, and students at the Asian University of Science and Technology in Chon Buri, Thailand, who cooperated in helping me do the research.

Finally, I am greatly indebted to my Thai friends and teachers without whose hospitality, encouragement, and support I could not have completed my studies at Payap University.
