## ACKNOWLEDGEMENTS

This thesis could not have been finished without the help of my teachers, family and friends. I would like to convey my thanks and gratitude to everyone who has provided valuable support in the pursuit of my graduate study and in making this research a reality.

I am deeply grateful to my thesis supervisor, Dr. Graeme Y. Ritchie, for his excellent supervision, invaluable guidance and constant encouragement throughout the course of this research work, and patience in correcting my thesis work.

Similarly, heartfelt gratitude is extended to Dr. Jenjit Gasigjitamrong for her kind advice on thesis's organization and guidance for a good thesis and how to work through the thesis.

Special thanks are also due to Dr. Jonathan Leather and Dr. Lamar G. Robert, who helped with the statistical part.

Appreciation is also due to Miss Kanyarat Eumumporn from Payap Research and Development Institute who helped in analyzing the statistical data.

A note of special appreciation should be given to my family: father, mother, sister, and cousin, who encouraged and supported me through the stressful time and filled my heart with the will to continue my studies.

To all of the teachers I wish to express my appreciation for their teaching and advice during my graduate studies at Payap University.
